BENDING PARAMETERS

- ✓ NEON MICRO CLASSIC CAN BE CURVED AS SHOWN BELOW

- ✗ DO NOT TWIST THE LIGHT OR BEND AGAINST THE LIGHT SURFACE

- Avoid bending LED Neon within the first unit (units are clearly marked with dashed lines on the sides of the product)

- LED Neon can be bent up to the defined "minimum bend radius" (60mm for Neon Micro Classic)

NEON MICRO CLASSIC | ELECTRICAL AND PHYSICAL INSTALLATION GUIDE

WIRING DIAGRAM

- LED Neon must always be used in conjunction with a certified Bright Light 24V DC power supply.
- Check the polarity of the connector before inserting the front connector and switching on the mains power.
- To minimise voltage drop and ensure consistent light output, position the power supply near to the power feed end of the LED Neon, and keep the line as short as possible
- Ensure your maximum run per power feed adheres to the guidelines; 15m when using a single connector, or 30m when using both connectors (see specification sheet).
- Ensure to add 20% buffer when selecting a power supply.
- Before making any cuts, installation, maintenance, or connection, be sure the mains power is disconnected.
- If essential; cut and connect LED Neon correctly. Any incorrect operation can cause damage.
- All connector joints must be connected correctly to achieve connector IP rating.
- All connector joints must be connected correctly to achieve connector IP rating.

PROFILE INSTALLATION REQUIREMENTS

- Ensure the supply cord is not subject to mechanical stress
- Keep 10–20mm distance between the end of the profile and the end mounting piece

- The bend angle should be less than 15 degrees when installing LED Neon into the profile by hand

NEON MICRO CLASSIC | ELECTRICAL AND PHYSICAL INSTALLATION GUIDE

PROFILE INSTALLATION REQUIREMENTS

- ❌ – Avoid placing mechanical stress on the front connector cable
- Do not curl or bend the front connector cable with excessive force

- Avoid installing the profile less than 10mm from the end mounting piece

- Install the LED Neon into the profile in one direction, don't let it bow in the middle

NEON MICRO CLASSIC | CONNECTIONS

CLASP CONNECTIONS - IP65

FEED CONNECTOR SUPPLIED AS 1M CABLE
DOUBLE POWER FEED: FEED 01 + FEED 02
