AUBRILAM
— SPACE COMES ALIVE —

A space is somewhere which only reveals its true identity and personality when lived in. We have been decorating spaces for 34 years.

With the new economic and environmental issues we have repositioned our activity, products and services.

To give life to space.

Aubrilam provides the substance : alive and sustainable, to give meaning, to beautify and create a place where life can thrive. Aesthetic, economic and ecologic products. Advice and support.

UTYL

use | cost | quality = Design

QUALITY

A « sustainably » designed product is a quality product.

As the outside environment does not spare the material, we make no concessions when it comes to the quality of the timber, steels and their finish*. Also aware that a public area will expose the UTYL range to damage due to human safety requirements, we have designed each product as an example of sustainability while ensuring they can be easily repaired or partially changed.

COST

A « well-thought » product is an economic product.

Bearing in mind that the price of a product depends on its purchase price and maintenance cost, we have designed each product of the UTYL range rationalising the use of material, minimising the logistics resources and simplifying the production processes. And as the use of a product in a public area is exposed both to the natural elements and possible damage from users, we have done our utmost to ensure they are low maintenance and easy to repair.

USE

A « useful » product for all users.

We have obviously thought of the end users of the UTYL range making ergonomics, attractive shapes and functions centre stage. And as the product users are also those who install it and maintain it, every attention has been paid to make installation, cleaning and maintenance as simple as possible. With these different uses in mind, the UTYL range is built to last, to enhance public areas and to offer furniture users its full potential over time in public areas and use.

CONCEPT

Designed from the web and the properties of the material.

A piece of furniture is indeed designed with the emphasis on shape, aesthetics, function, use and durability. However, the key to a successful design is in the «spirit» it embodies.

The crux of the FLAVARD & SAGUEZ approach is to regard a piece of furniture as an extension of the body with an intimate, physical and narrative relationship with the user. A piece of furniture can then be designed as a complete body with a structure and a sensitive inseparable casing. This casing and the first to be noticed, is made out of solid timber. Reassuring, warm, resilient and durable wood brings substance, consistency and character to the UTYL range. It sits proud in the contact areas with passers-by or users.

It blends into each piece of the range on a metal structure chosen for its rigid, reliable and robust virtues. The metal parts are made of simple cut, bent and assembled surfaces leaving only the thickness (web) of the metal.

It is through this assembly of two, what appear as antagonist materials, that they are made sublime. This is further reinforced by insisting on the formal associations of each material: industrial for the steel and craftsmanship for the wood.

Xavier Flavard | FLAVARD & SAGUEZ

* Electro-galvanised steel structure with powder coated polyester. Glued laminated timber certified ACERBOIS GLULAM, with PEFC or FSC labels, as per the HTE process. Finished with 3 coats of woodstain.

UTYL 01

MODEL BENCH

Electro-galvanised steel structure, powder coated polyester, finish Black 100 sanded. Seat and backrest in glued laminated timber certified ACERBOIS GLULAM, produced with sawn planks from sustainably managed forests and designed in conformity with HTE process. Timber finished with three coats of woodstain, Brume. Must be fixed to the ground.

Height: 890 | Length: 1864 | Width: 579 | Weight: 33,8
Units: millimetres and kilograms

UTYL 02

BENCH

Electro-galvanised steel structure, powder coated polyester, finish Black 100 sanded. Seat in glued laminated timber certified ACERBOIS GLULAM, produced with sawn planks from sustainably managed forests and designed in conformity with HTE process. Timber finished with three coats of woodstain, Brume. Must be fixed to the ground.

Height: 450 | Length: 1864 | Width: 468 | Weight: 22,5
Units: millimetres and kilograms

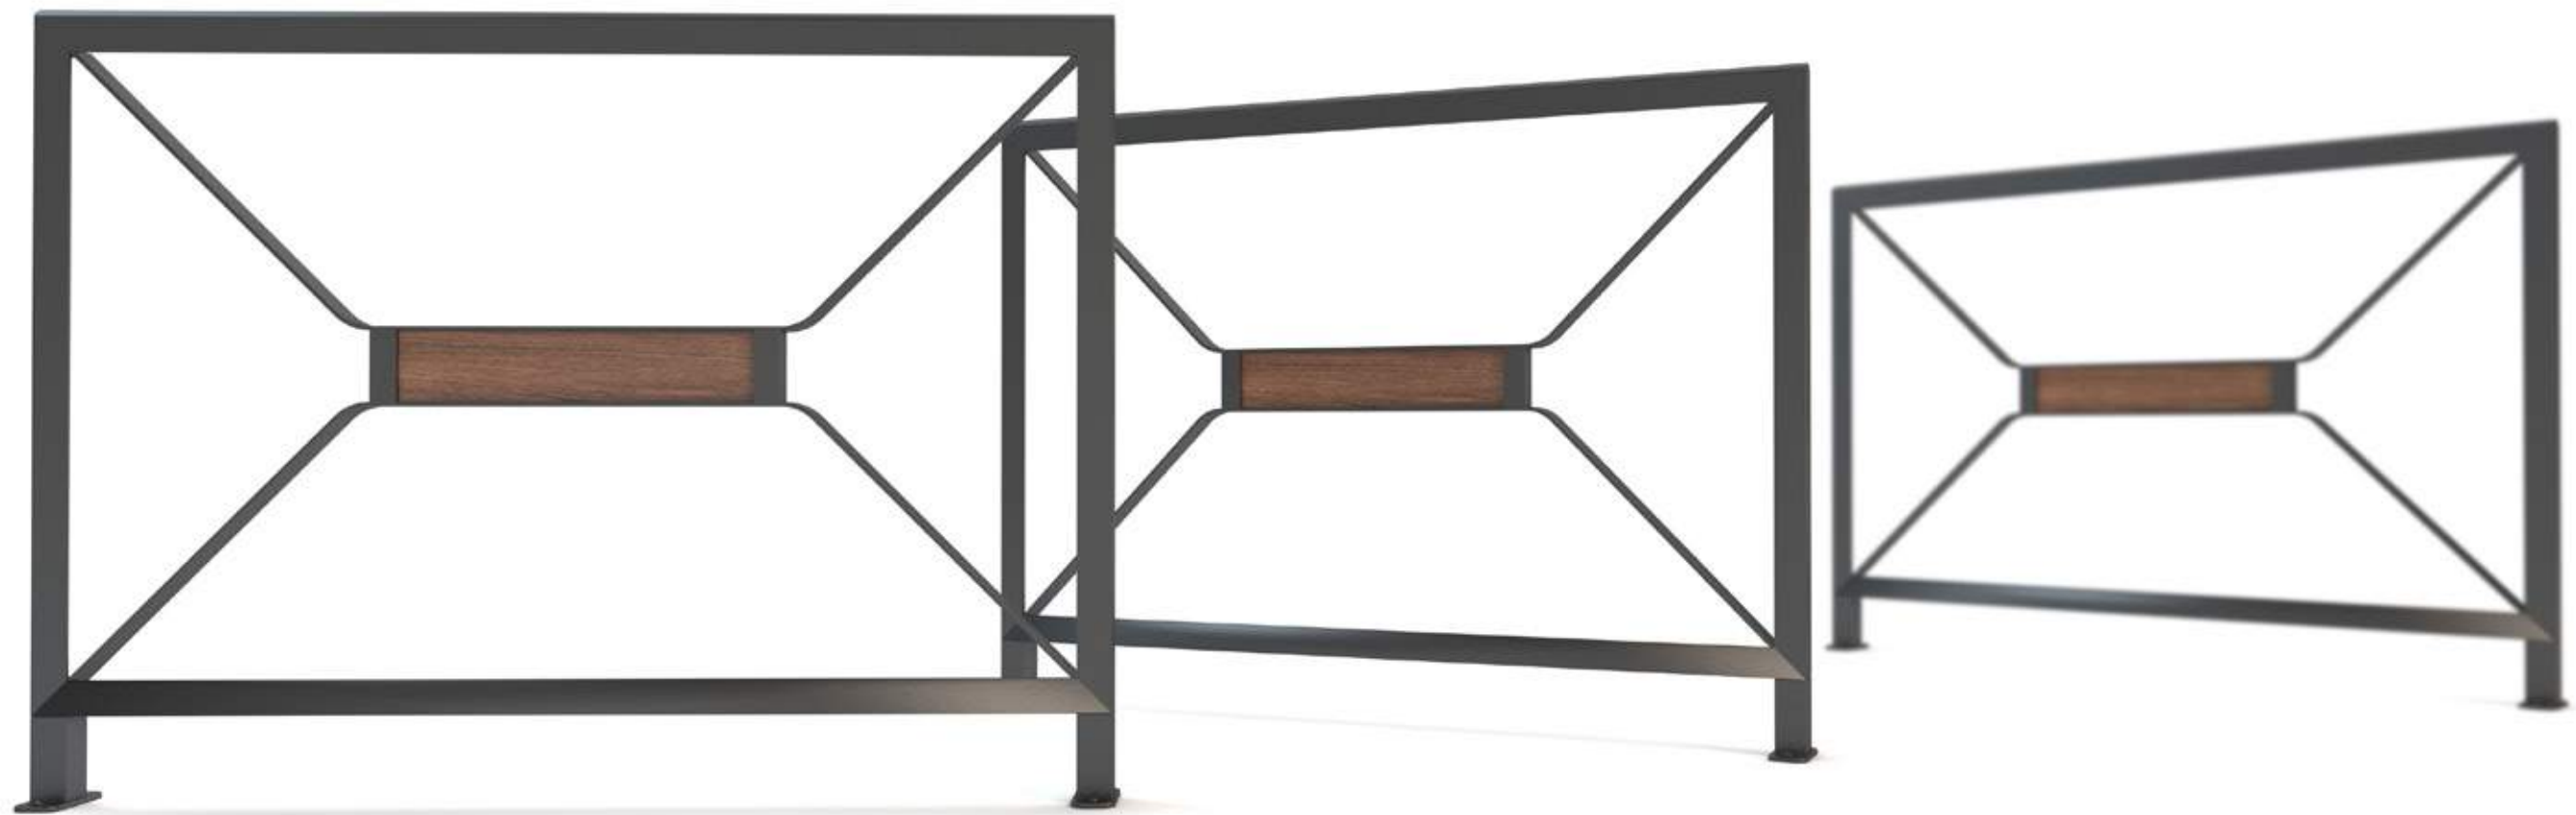

UTYL 03

BARRIER

Electro-galvanised steel structure, powder coated polyester, finish Black 100 sanded. Wood decor in glued laminated timber certified ACERBOIS GLULAM, produced with sawn planks from sustainably managed forests and designed in conformity with HTE process. Timber finished with three coats of woodstain, Brume. Buried root: depth 300mm. (Flange plate in option).

Height: 890 | Length: 1200 | Width: 40 | Weight: 16,45
Units: millimetres and kilograms

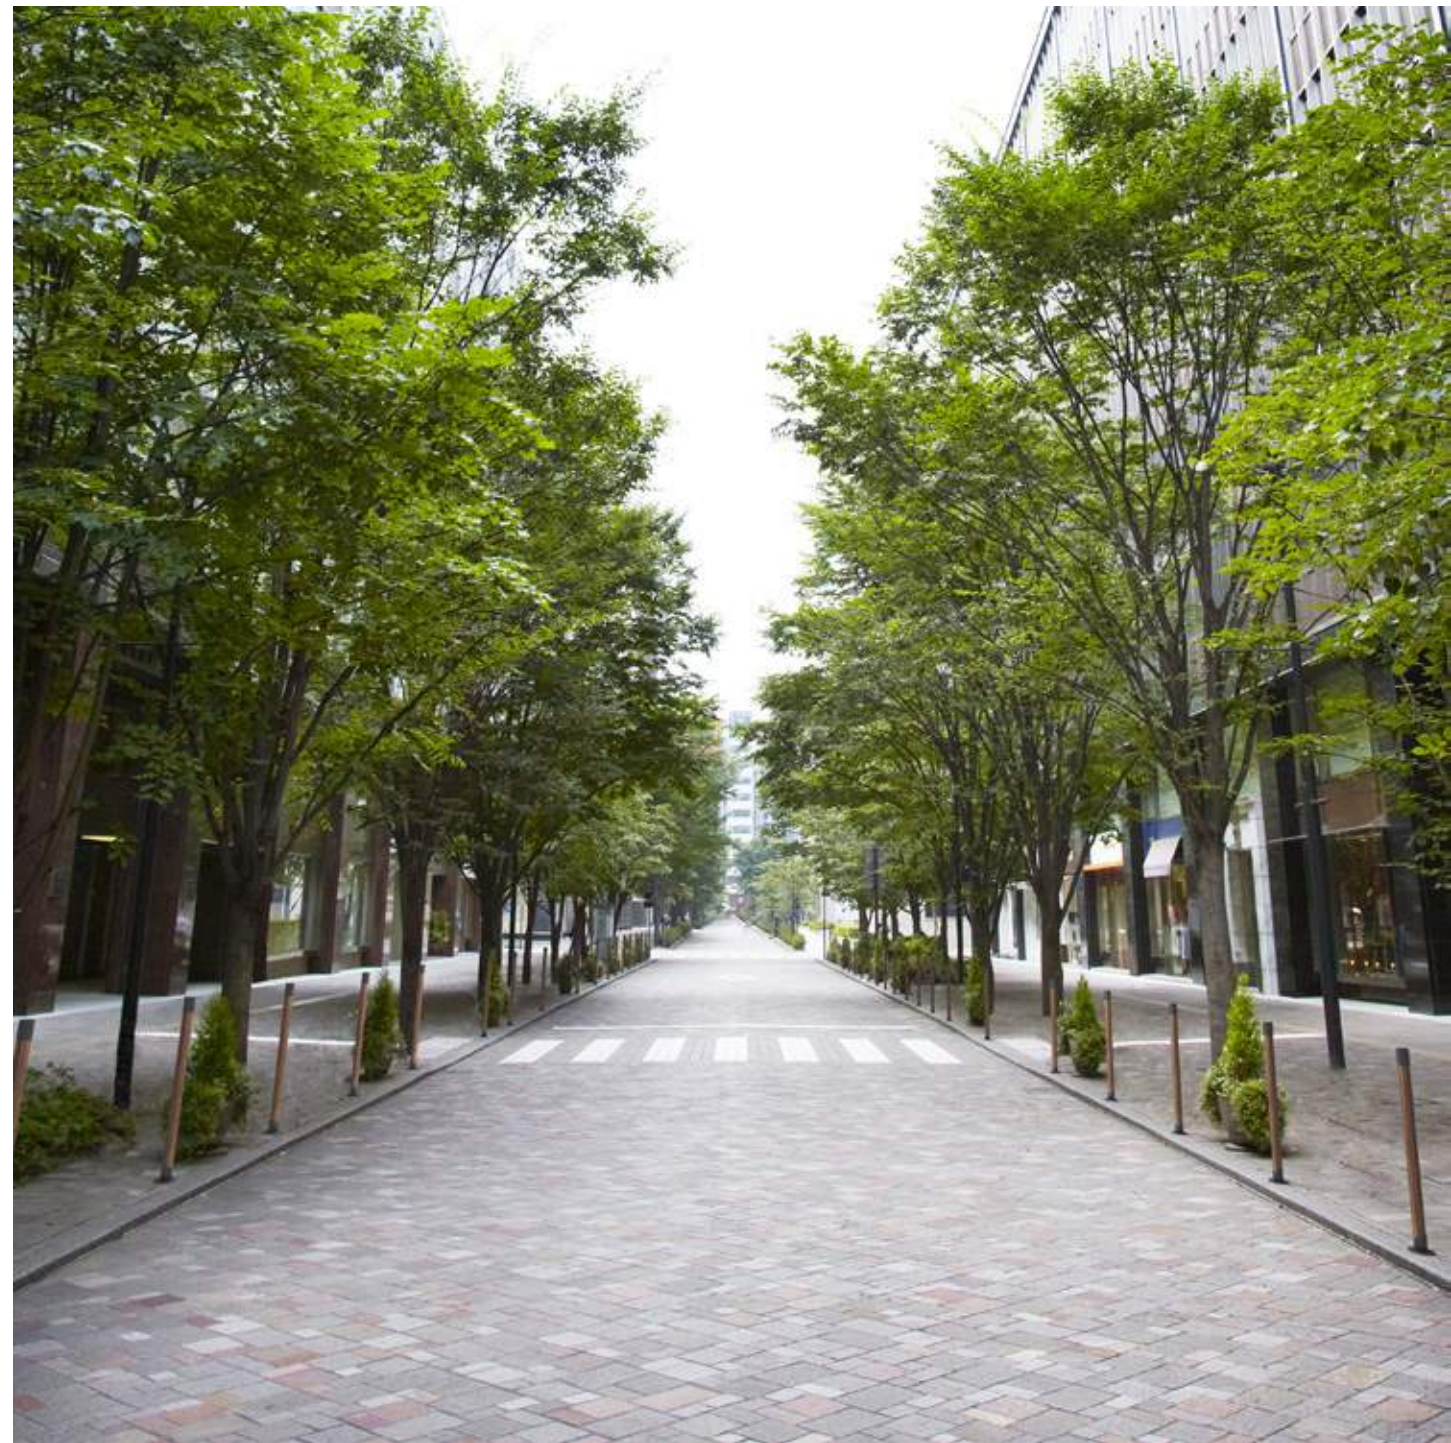

UTYL 04

BOLLARD

Electro-galvanised steel structure, powder coated polyester, finish Black 100 sanded. Wood decor in glued laminated timber certified ACERBOIS GLULAM, produced with sawn planks from sustainably managed forests and designed in conformity with HTE process. Timber finished with three coats of woodstain, Brume. Buried root: depth 300mm. (Flange plate in option).

Height: 900 and 1200 | Diameter: 70 | Weight: 6,4 and 8,3
Units: millimetres and kilograms

UTYL 05

DIAPASON BOLLARD

Description of the structure, casings and fixations - see page 20.

Height: 900 and 1200 | Diameter: 76 | Weight: 4,8 and 6,7
Units: millimetres and kilograms

UTYL 06

CYCLE STAND

Electro-galvanised steel structure, powder coated polyester, finish Black 100 sanded. Wood decor in glued laminated timber certified ACERBOIS GLULAM, produced with sawn planks from sustainably managed forests and designed in conformity with HTE process. Timber finished with three coats of woodstain, Brume. Must be fixed to the ground.

Height: 900 | Length: 250 | Width: 70 | Weight: 15
Units: millimetres and kilograms

UTYL 07

■ ASHTRAY

Electro-galvanised steel structure, powder coated polyester, finish Black 100 sanded. Stainless steel removable tank and top cover. Triangular key lock and closing hook. Capacity: 0.75l. Must be fixed to the ground.

Height: 787 | Diameter: 115 | Capacity: 0,75 | Weight: 5,3
Units: millimetres, litres and kilograms

UTYL 08

LITTER BIN

Electro-galvanised steel structure, powder coated polyester, finish Black 100 sanded. Beech plywood decor, HPL veneer, Tirano décor (ref. 0797). UV-proof protection on the sides. Removable tank, key lock. Capacity 30l. Must be fixed to the ground.

Height: 910 | Width: 400 | Capacity: 30 | Weight: 23,5
Units: millimetres, litres and kilograms

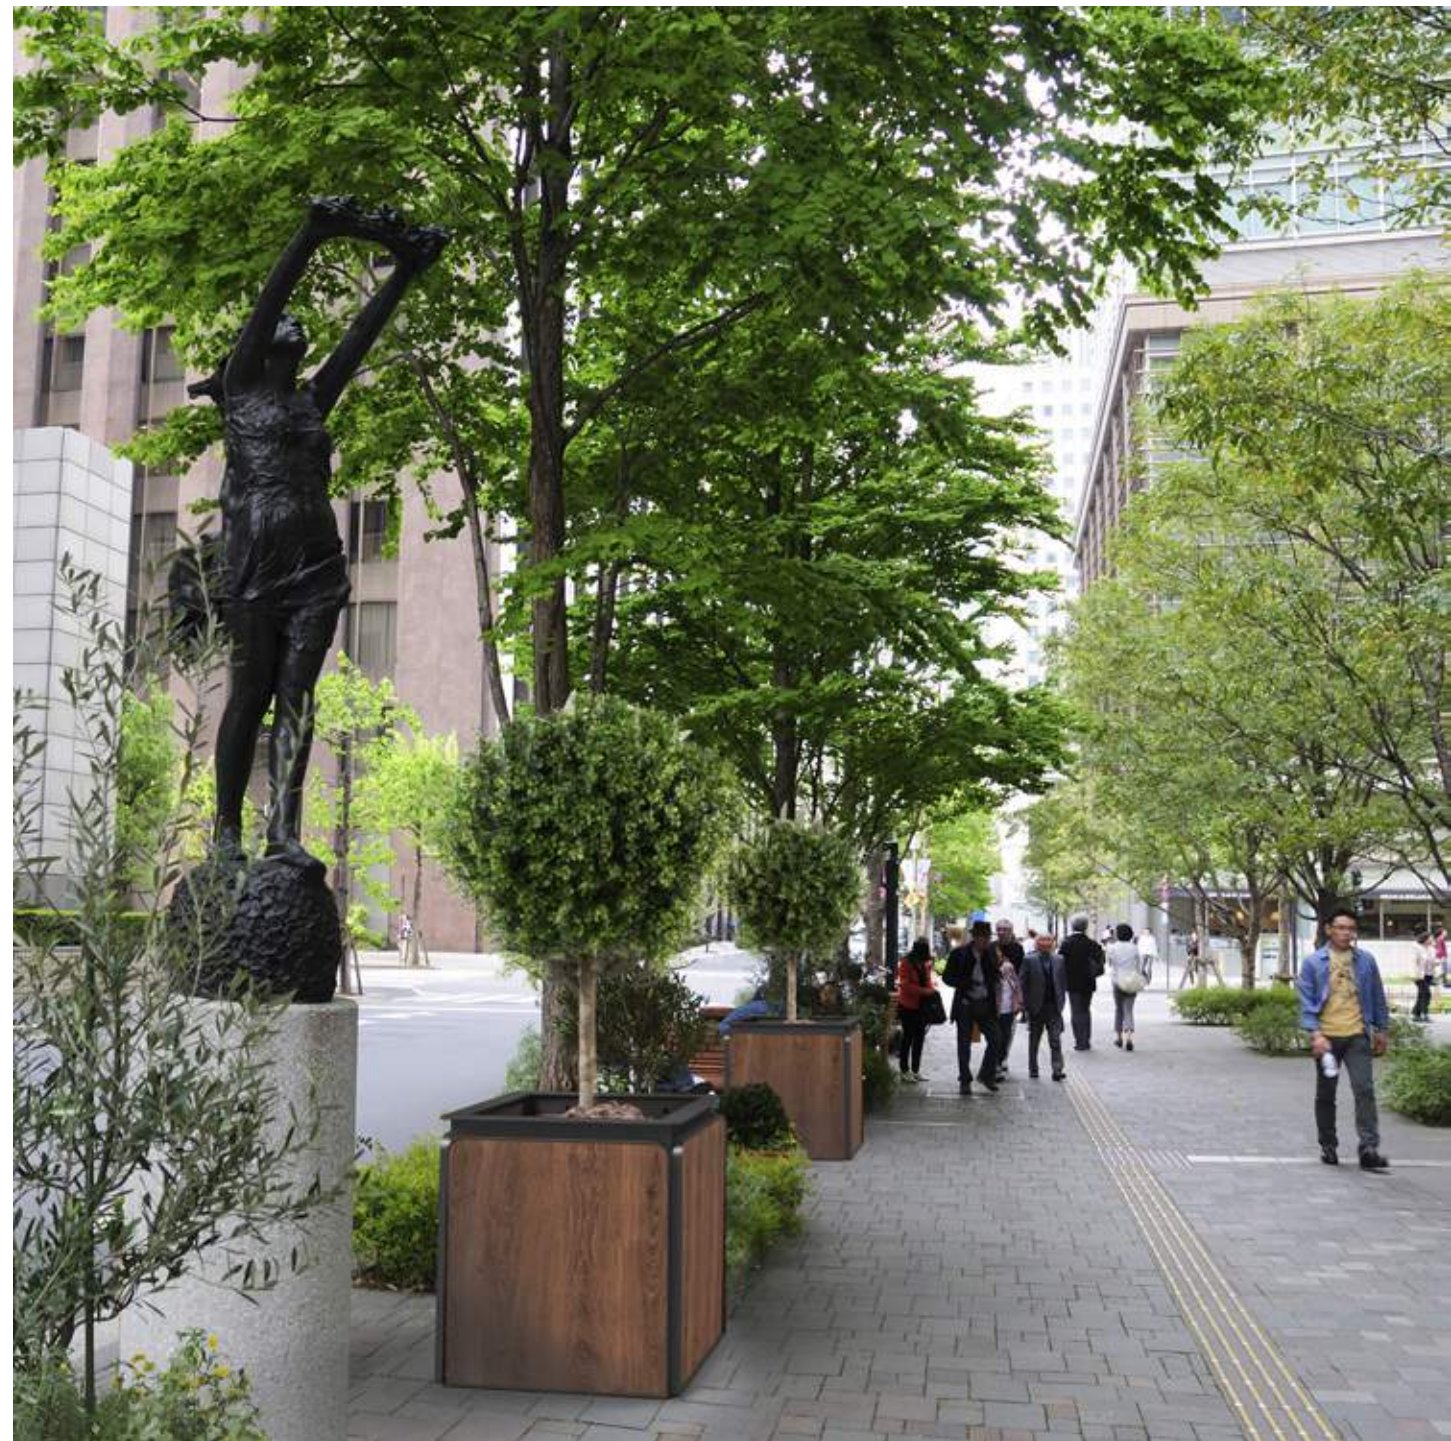

UTYL 09

PLANTER

Electro-galvanised steel structure, powder coated polyester, finish Black 100 sanded. 12mm HPL decor, Tirano décor (ref. 0797). Polyethylene tank, key lock. Capacity 280l.

Height: 820 | Width: 800 | Capacity: 280 | Weight: 73,8
Units: millimetres, litres and kilograms

A close-up photograph of a wooden table edge and a dark, curved metal leg. The wood has a natural grain pattern and a warm, light brown tone. The metal leg is a dark, matte black color with a slightly textured surface. The lighting is soft, highlighting the textures of both materials. The background is blurred, showing more of the table and the leg.
